JEFFREY FREDMAN  
PRIMARY EXAMINER

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 4, 2007 has been entered.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The newly added limitation to the microarray analysis method is setting a threshold between  $i$  base mismatches and  $i+1$  base mismatches where  $i$  is an integer not less than 1. This new limitation means that the threshold cannot be between a perfect match and a single (or multiple) mismatch since  $i$  must be at least 1, so the threshold must be between at least 1 mismatch and two mismatches (or any greater values). Gingeras, and the entire field of prior art, is replete with examples in which perfect matches are distinguished from mismatches (as exemplified at column 38, lines 33-67 of Gingeras). However, no prior art was found in which the threshold of sensitivity was set between 1 and 2 mismatches, 2 and 3 mismatches, etc. In the absence of any prior art teaching or suggesting this element, the invention is novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
